December 23, 2009

Dear FCC Licensee:

Detroit Television Station WKBD Inc. licensee of TV station WKBD-TV has been authorized by the Federal Communications Commission (FCC) to construct and operate a digital television broadcast station at Detroit, MI on TV channel 14. This firm represents WKBD-TV in the capacity of its engineering consultant regarding certain FCC issues.

The digital television station began broadcasting on DTV Channel 14 in August, 2000 and WKBD-DT has been operating with an Effective Radiated Power of 57.8 kilowatts since that time. The FCC has recently authorized operation with an Effective Radiated Power of 180 kilowatts. WKBD-DT will commence operation with the higher power sometime during the first weeks of January, 2009. Because Channel 14 operates on frequencies (470-476 MHz) immediately adjacent to the 460-470 MHz radio frequency band in which your equipment operates, the FCC has asked WKBD-TV to take special precautions to make sure that no interference results to other users such as you. To comply with the FCC request, WKBD-TV has incorporated special features in the construction of the station to prevent any interference from occurring.

Should you have any questions regarding this facility, you may call this firm at 248-642-6226; if you are unfamiliar with technical issues, you may wish to refer this letter to your equipment / service provider. We stand ready to address any of your concerns regarding the operation of the TV station.

Sincerely,

John F.X. Browne, P.E.
for Detroit Television Station WKBD Inc.

J. C. Curley & Company
Broadcast Consultants
Naples Orlando

To: Administrator or Biomedical Engineer

Date: December 9, 2008

NOTICE OF MAXIMIZATION OF DIGITAL TELEVISION (DTV) OPERATIONS

THIS LETTER CONCERNS TELEMETRY OPERATION. PLEASE ASSURE THAT THOSE WHO SUPERVISE OR MAINTAIN CLINICAL OR BIOMEDICAL ENGINEERING AT YOUR FACILITY RECEIVE IT.

The station listed above has retained Curley & Company, Inc., broadcast consultants, to inform you of its intention to begin digital television (DTV) maximization operations in your area.

All full power television stations are required by law to begin providing DTV services, and have been given second television channels for that purpose. We are notifying you of our intention to begin DTV maximization operations because patients within your facility may use biomedical telemetry devices that operate in the television broadcast band, and may be affected when we begin our maximization DTV service.

The rules of the Federal Communications Commission (codified at 47 CFR 15.242) have allowed certain biomedical telemetry devices to use unoccupied DTV channels in their area *on a secondary basis*. This means that the medical facility or operator of the device is responsible for resolving any interference problems that may arise with the digital television-broadcast service or, alternatively, must cease its operations on that channel.

The purpose of this notice is to provide you information and a reasonable opportunity to resolve problems. However, you will want to discuss this with your technology supplier especially if you believe that biomedical devices used in your facility are likely to malfunction when we begin our DTV maximization operations. *If you plan to replace your biomedical equipment, we urge that you purchase equipment designed to operate in the frequencies set aside for medical use.*

The commencement date, DTV channel and frequency band for each station are listed on the attached pages (or reverse) along with contact information for the broadcast executive in charge of DTV for the station. If you wish more information or you want to report anticipated or actual interference problems please contact the individual listed on the attached page who is associated with the specific channel.

Respectfully,

J. C. Curley & Company

1616 Point Pleasant Ave. W., Bradenton, Florida 34205

Page 2 The relevant technical details of our proposed DTV operations:

Please Note: This is the final notice that medical facilities in the Detroit, MI. area may receive from station WKBD- DT regarding DTV operations.

The initial notice was sent announcing the stations' intention to begin DTV operations on Digital Channel 14 located at 470-476 MHz at 58.7 kW.

This notice is to inform you that WKBD-DT will operate at its fully authorized power as indicated below. Please check your telemetry gear to insure that there will be no interference to operations or patient safety.

**WKBD-TV Channel 50; Network-CW
Detroit, MI.**

WKBD-DT

DTV Channel:	14
Frequency Band:	470-476 MHz
Scheduled On-air Date:	On or after January 8, 2009
Effective Radiated Power:	180 kW ERP Fully Authorized by the Federal Communications Commission.
Antenna Location	42-29-01 North Latitude; 83-18-44 West Longitude Located at 26955 West 11 Mile Road, Southfield, MI.
Antenna Height:	269 meters Height Above Average Terrain 500 meters Radiation Center Above Mean Sea Level 287 meters Radiation Center Above Ground Level
Contact:	Chuck Davis, Director of Engineering
Telephone	Station; 248-355-7000
Fax	248-359-7492

J. C. CURLEY & COMPANY METHODOLOGY

RESEARCH

We determine the signal reach of the television station client. When more than one station is involved, we create a composite drawing of the grade B contour of the combined signal areas.

Our research philosophy is to cast a broad net over this defined geographical area that identifies licensed medical facilities within 50 miles of each transmitter location and that meet the following criteria:

- All general and surgical hospitals (especially cardiology, children, burn, etc.)
- All cardiology treatment centers and physician staffed clinics
- Free standing urgent care facilities
- Ambulatory medical surgical facilities
- Cardiology treatment facilities (not cardiologists)
- Medical centers
- Skilled nursing facilities associated with a hospital.
- Animal surgical hospitals associated with Schools of Veterinary Medicine

Once we have created a gross data base (in New Orleans, as an example, there were over 750 listings for medical facilities), we then eliminate (sometimes using telephone confirmation) those entities not meeting a narrower bio-telemetry technology criteria. (In New Orleans, our example, the edited list contained 245 names.)

MAILING AND REPORT FOR THE PUBLIC FILE

A formal letter approved by the station that includes the pertinent DTV data is sent via either US Postal Certified Mail or Proof of Mailing (based upon client needs) to all the medical facilities on the edited mailing list. We then prepare a report for the stations' Public File consisting of a summary cover letter, a copy of the notice and technical data, a copy of the address list, a map of the signal area and a list of the counties used in our research, and the US Post Office documentation of mailing. At a later time, we collect any non-deliverable envelopes and forward these to the stations for inclusion in their DTV report.

SPECIAL SITUATIONS

Obligation for International Notices. For those stations whose signals cross country borders, both the FCC Video Division and the International Division has opined that there are no treaties or rulings requiring stations to inform medical facilities outside of the USA. However, they recommend a "common sense" practice in which the bordering foreign medical facilities receive attention equal to that given to domestic entities. In El Paso, for instance, we confirmed our research of medical facilities with the American Consulate General's Office in Ciudad Juarez, Mexico, then translated the Notices and technical information into Spanish before mailing them to the Mexico locations.
